

ODP 158-77
28 January 1977

MEMORANDUM FOR: Deputy Director for Administration
FROM : Clifford D. May, Jr.
Director of Data Processing
SUBJECT : ODP Report for Week Ending 28 January 1977

ITEL Requests Procurement Information Under FOIA

ITEL Corporation has submitted a request to CIA for information under FOIA pertaining to procurement of Automatic Data Processing (ADP) equipment, in particular CPU and disk drives, under blanket Delegation of Procurement Authority from General Services Administration (GSA) dated December 7, 1973. GSA General Counsel has requested the Agency provide information pertinent to mandatory requirements contract for Model 33301 single density disk drive equipment. Office of Logistics has asked ODP to review our requirements to convert presently installed CDC disk drive equipment from lease to purchase.

DDCI ADP Key Issue #3

The second meeting of the ADP AD Hoc Working Group was held on January 24 on DDCI ADP Issue Number 3, Centralization versus Decentralization of computer facilities. Tasked assignments were made and progress is going ahead.

New Procedure to Update Computer Users File

Procedures have been initiated for OP to provide ODP with a weekly list of employee separations. This information will be used as a basis for deletion of USERID's and passwords.

CAMS

A problem with the CAMS monitor which created a backlog of forty (40) to sixty (60) incoming messages has been fixed. Currently, the backlog is approximately twenty (20) messages and the daily incoming messages are being processed on schedule.

Tasking software was released to COMIREX and they are now sending operational messages [REDACTED]

STATINTL

By mutual agreement between ODP and COMIREX, CANS will not be supported during the planned power outage on January 30. All customers have been notified.

SAFE

STATINTL

In view of the relatively high cost proposed [REDACTED] the analysis and development of communications components will not be undertaken as previously planned. This work will be let competitively [REDACTED] will be used as a consultant.

STATINTL

Substantive changes to the Requirements Document have been halted and editing for publication is being completed this week. The edited version will be circulated for approval of the SAFE Steering Committee.

DIA coordination was limited to telephone contact this week in order to complete work on the DDI issues. We currently plan to develop a Management Plan with DIA for defining our joint activities and outlining the circumstances under which they can be accomplished.

ADSTAR

STATINTL

As a result of discussions with [REDACTED] (SRL) we have completed an agreed Statement of Work for a technical study of an image distribution system. This study will have a duration of five months. We are now waiting for [REDACTED] to submit a cost estimate of the study.

TADS

On 26 January Mr. [REDACTED] (Project Manager) and Mr. [REDACTED] (Contract Administrator) visited SPS to present their 'Plan to Complete' the TADS project. This plan included schedule data, staffing plans, and a proposed new Milestone payment plan. Although the new schedule shows a three month extension of the Design Phase, the completion date estimate has increased by one month. The difference is to be made up by adding two more people to their Implementation Team (making a total of 15).

STATINTL

The current estimate for 'Cost to Complete' is at the Ceiling Price of the negotiated FPI contract. This is caused in part by an overall one month slip and as a result of using more people during the Design Phase than originally planned.

RAPID

A memorandum was produced defining the exact nature of the communications problem on the RAPID system. Evaluation of the [REDACTED] proposal is continuing to determine the reasonableness of cost and adequacy of solution.

STATINTL

The candidate COTR for RAPID has rejected the Agency offer and the position is being filled internally.

Support to the Office of Security

SACS - Security Access Control System. The ODP test phase of the SACS statistical reporting program is complete and has been delivered to OS for final testing and live data.

Support to the Office of Personnel

PERSIGN - Integrated Personnel Information System. PERSIGN-II activities this week include:

- a. Received updated specifications for the Age/Grade Distribution Reports and are making the changes.
- b. Completed the draft of the STAFFING portion of the proposal.
- c. Distributed an interface requirements questionnaire to all known projects that need personnel data.

Support to the Office of Finance

PAYROLL - Agency Payroll System. The programming requirements for legal requirements remain on schedule.

GAS - General Accounting System. Programs were written and implemented to correct the interface problems between GAS and FRS, enabling the Trend Reports to be distributed on Friday, 21 January.

FRS - Financial Resource System. We produced Trend Reports for December on 21 January. Trends for January will be produced on 7 February.

Support to the Office of Central Reference

CRSCHINA - On-line processing of a variety of China files. We have completed the testing of the pilot system for the automation of the publication of the OCR Directories for Foreign Officials. The results of the pilot system are being evaluated by OCR.

Support to the Office of Geographic and Cartographic Research

CARTDEV - Development of new cartographic organizations. We have completed the generation of World Data Bank II associated data sets. These data sets have allowed the execution of map generating programs in thirty minutes. Previously 10 to 12 hours were required for the computer program to pass through the system using the old data sets.

Processing

GIMPROD has been running on the 370/168-2, mainly, since 22 January because of intermittent problems on the 360/195. However, the 360/195 problems appear to be resolved and GIMPROD will be moved back to the 360/195 on 27 January if no further problems are encountered.

Training

A two-day Data Processing Concepts course was completed by 10 students.

STATINTL

The first three days of an eight-day GIM II Dictionaries course was completed by 14 students.
